

The Iranian politics

The Iranian regime controls the population of Iran through various methods and mediums. Jailing journalists, people who protest are threatened into silence. Even the Iran wants to block Google and wants to create their own internet and also the Facebook is filtered in countries like Iran. The current Iranian regime is corrupt.

Media can construct reality.

“The media are responsible for the majority of the observations and experiences from which we build up our personal understandings of the world and how it works. Much of our view of reality is based on media messages that have been reconstructed and have attitudes, interpretations, and conclusions already built in. Thus the media, to a great extent, give us our sense of reality” (John Pungente,1999). Example of what is going on in Iran right now. People are deprived of rights. Women are banned from so many university courses. People are against the government and want to change it but they get silenced by the government and most of the problems in Iran we observe through media.
